Report of Operations – Financial

The information contained on this page does not form part of the audited financial results for the year ended 30 June 2017 but is based on information contained within the audited statements.

Summary of Financial Results

For the Financial Year ended 30 June 2017

	2017 \$	2016 \$	2015 \$	2014 \$	2013 \$
Total Revenue	4,912,772	4,568,865	4,613,971	4,367,844	3,810,005
Total Expenses	4,890,407	4,588,707	4,910,710	4,277,956	4,365,830
Gains/Losses from Other Economic Flows	31,199	0	0	0	0
Net Result before Capital & Specific Items*	21,484	45,699	45,787	19,554	(146,437)
Net Result for the year	53,564	(19,842)	(296,739)	89,888	(555,825)
Retained Surplus/Accumulated Deficit)	54,440	876	(78,969)	217,770	127,882
Total Assets	16,557,728	16,209,160	16,014,851	16,750,179	11,683,384
Total Liabilities	4,488,459	4,242,065	4,027,914	4,466,503	3,069,631
Net Assets	12,069,269	11,967,095	11,986,937	12,283,676	8,613,753
Equity	12,069,269	11,967,095	11,986,937	12,283,676	8,613,753

* The Net Result before Capital & Specific Items is the result for which the hospital is monitored in its Statement of Priorities.

Significant Changes in Financial Position

The Cash and Cash Equivalent/Investments balances held by Maldon Hospital increased during the year by \$236,881. This increase was as the result of the increased value of monies held in trust which is predominately Residential Aged Care Refundable Accommodation Deposits. This increase has resulted in an equivalent increase in the Other Current Liabilities balance reported in the Balance Sheet.

Operational and Budgetary Objectives and Factors Affecting Performance

Like all Health Services, Maldon Hospital is required to negotiate a Statement of Priorities with the Department of Health & Human Services each year. This document is a key accountability agreement between Maldon Hospital and the Minister for Health & Human Services. It recognises that resources are limited and that the allocation of these scarce resources needs to be prioritised. The Statement incorporates both system-wide priorities set by the Government and locally generated agency-specific priorities.

Maldon Hospital is striving to achieve operating surpluses on an ongoing basis to ensure the organisation can generate the cash needed to meet operating and capital investment requirements into the future. The Board aimed for a breakeven result before capital items and depreciation in the Statement of Priorities for the 2016/17 financial year and ended the year with a surplus result.

Both the organisation and the Department of Health & Human Services focus on the result before capital and depreciation, as depreciation is not a funded item. Funding for capital redevelopment and major equipment purchases are sourced from the Government; such funding is allocated according to need and after consideration of a supporting submission.

Financial sustainability performance

Statement of Priorities Measure Finance	Target	2016–17 Actual
Annual Operating Result	\$0	\$21,484
Creditors	<60 days	32 days
Debtors	<60 days	8 days

Events Subsequent to Balance Date

There have been no events subsequent to balance date that will have a significant effect on the operations of the of the health service in subsequent years.

Details of Consultancies (under \$10,000)

In 2016/17, there was one consultancy where the total fees payable to the consultants were under \$10,000. The total expenditure incurred during 2016-17 in relation to this consultancy is \$3,416.

Details of Consultancies (valued at \$10,000 or greater)

In 2016/17, there was one consultancy where the total fees payable to the consultants were \$10,000 or greater. The total expenditure incurred during 2016-17 in relation to this consultancy is \$31,075.

Details of individual consultancies can be viewed at <http://www.maldhosp.vic.gov.au/about/corporate-consultancy-details>.

Details of Information and Communication Technology (ICT) Expenditure

The total ICT expenditure incurred during 2016-17 is \$135,579 (excluding GST) with the details shown below.

Business as Usual (BAU) ICT expenditure*	Non-Business as Usual (non-BAU) ICT expenditure*	Operational Expenditure*	Capital Expenditure*
\$	\$	\$	\$
\$135,579	0	\$121,429	\$14,150

Independent Auditor's Report

To the Board of Maldon Hospital

Opinion	<p>I have audited the financial report of Maldon Hospital (the health service) which comprises the:</p> <ul style="list-style-type: none"> • balance sheet as at 30 June 2017 • comprehensive operating statement for the year then ended • statement of changes in equity for the year then ended • cash flow statement for the year then ended • notes to the financial statements, including a summary of significant accounting policies • board member's, accountable officer's and chief finance & accounting officer's declaration.
----------------	--

In my opinion the financial report presents fairly, in all material respects, the financial position of the health service as at 30 June 2017 and their financial performance and cash flows for the year then ended in accordance with the financial reporting requirements of Part 7 of the *Financial Management Act 1994* and applicable Australian Accounting Standards.

Basis for Opinion	<p>I have conducted my audit in accordance with the <i>Audit Act 1994</i> which incorporates the Australian Auditing Standards. My responsibilities under the Act are further described in the <i>Auditor's Responsibilities for the Audit of the Financial Report</i> section of my report.</p> <p>My independence is established by the <i>Constitution Act 1975</i>. My staff and I are independent of the health service in accordance with the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 <i>Code of Ethics for Professional Accountants</i> (the Code) that are relevant to my audit of the financial report in Australia. My staff and I have also fulfilled our other ethical responsibilities in accordance with the Code.</p> <p>I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.</p>
--------------------------	---

Board's responsibilities for the financial report	<p>The Board of the health service is responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards and the <i>Financial Management Act 1994</i>, and for such internal control as the Board determines is necessary to enable the preparation and fair presentation of a financial report that is free from material misstatement, whether due to fraud or error.</p> <p>In preparing the financial report, the Board is responsible for assessing the health service's ability to continue as a going concern, and using the going concern basis of accounting unless it is inappropriate to do so.</p>
--	--

**Auditor's
responsibilities
for the audit
of the financial
report**

As required by the *Audit Act 1994*, my responsibility is to express an opinion on the financial report based on the audit. My objectives for the audit are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, I exercise professional judgement and maintain professional scepticism throughout the audit. I also:

- identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the health service's internal control
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board
- conclude on the appropriateness of the Board's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the health service's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the health service to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.

I communicate with the Board regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

MELBOURNE
1 September 2017

Ron Mak
as delegate for the Auditor-General of Victoria

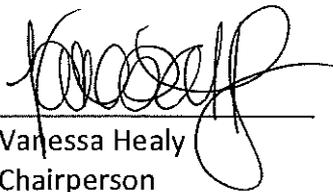

Maldon Hospital

Board member's, accountable officer's and chief finance & accounting officer's declaration

The attached financial statements for *Maldon Hospital* have been prepared in accordance with Direction 5.2 of the Standing Directions of the Minister for Finance under the *Financial Management Act 1994*, applicable Financial Reporting Directions, Australian Accounting Standards including Interpretations, and other mandatory professional reporting requirements.

We further state that, in our opinion, the information set out in the comprehensive operating statement, balance sheet, statement of changes in equity, cash flow statement and accompanying notes, presents fairly the financial transactions during the year ended 30 June 2017 and the financial position of Maldon Hospital at 30 June 2017.

At the time of signing, we are not aware of any circumstance which would render any particulars included in the financial statements to be misleading or inaccurate. We authorise the attached financial statements for issue on this day.

This Statement should be read in conjunction with the accompanying notes

Basis of presentation

These financial statements are presented in Australian dollars and the historical cost convention is used unless a different measurement basis is specifically disclosed in the note associated with the item measured on a different basis.

The accrual basis of accounting has been applied in the preparation of these financial statements whereby assets, liabilities, equity, income and expenses are recognised in the reporting period to which they relate, regardless of when cash is received or paid.

Consistent with the requirements of AASB 1004 *Contributions* (that is contributed capital and its repayment) are treated as equity transactions and, therefore, do not form part of the income and expenses of the hospital.

Additions to net assets which have been designated as contributions by owners are recognised as contributed capital. Other transfers that are in the nature of contributions to or distributions by owners have also been designated as contributions by owners.

Transfers of net assets arising from administrative restructurings are treated as distributions to or contribution by owners. Transfer of net liabilities arising from administrative restructurings are treated as distribution to owners.

Judgements, estimates and assumptions are required to be made about financial information being presented. The significant judgements made in the preparation of these financial statements are disclosed in the notes where amounts affected by those judgements are disclosed. Estimates and associated assumptions are based on professional judgements derived from historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

Revisions to accounting estimates are recognised in the period in which the estimate is revised and also future periods that are affected by the revision. Judgements and assumptions made by management in applying the application of AASB that have significant effect on the financial statements and estimates are disclosed in the notes under the heading: 'Significant judgement or estimates'.

Note 1: Summary of significant accounting policies

These annual financial statements represent the audited general purpose financial statements for Maldon Hospital for the period ending 30 June 2017. The report provides users with information about the Health Services' stewardship of resources entrusted to it.

(a) Statement of compliance

These financial statements are general purpose financial statements which have been prepared in accordance with the *Financial Management Act 1994* and applicable AASs, which include interpretations issued by the Australian Accounting Standards Board (AASB). They are presented in a manner consistent with the requirements of AASB 101 *Presentation of Financial Statements*.

The financial statements also comply with relevant Financial Reporting Directions (FRDs) issued by the Department of Treasury & Finance, and relevant Standing Directions (SDs) authorised by the Minister for Finance.

Maldon Hospital is a not-for profit entity and therefore applies the additional Aus paragraphs applicable to "not-for-profit" Health Services under the AASBs.

The annual financial statements were authorised for issue by the Board of Maldon Hospital on 30 August 2017.

Note 1: Summary of significant accounting policies (continued)

(b) Reporting entity

The financial statements include all the controlled activities of Maldon Hospital.

Its principal address is:

Chapel Street
Maldon
Victoria 3463

A description of the nature of Maldon Hospital's operations and its principal activities is included in the report of operations, which does not form part of these financial statements.

Objectives and funding

Maldon Hospital's overall objective is to be a thriving Health Service contributing to a happy and healthy community, as well as improve the quality of life to Victorians.

Maldon Hospital is predominantly funded by accrual based grant funding for the provision of outputs.

(c) Basis of accounting preparation and measurement

Accounting policies are selected and applied in a manner which ensures that the resulting financial information satisfies the concepts of relevance and reliability, thereby ensuring that the substance of the underlying transactions or other events is reported.

The accounting policies set out below have been applied in preparing the financial statements for the year ended 30 June 2017, and the comparative information presented in these financial statements for the year ended 30 June 2016.

The going concern basis was used to prepare the financial statements.

These financial statements are presented in Australian dollars, the functional and presentation currency of the Health Service.

The financial statements, except for cash flow information, have been prepared using the accrual basis of accounting. Under the accrual basis, items are recognised as assets, liabilities, equity, income or expenses when they satisfy the definitions and recognition criteria for those items, that is they are recognised in the reporting period to which they relate, regardless of when cash is received or paid.

The financial statements are prepared in accordance with the historical cost convention, except for:

- non-current physical assets, which subsequent to acquisition, are measured at a revalued amount being their fair value at the date of the revaluation less any subsequent accumulated depreciation and subsequent impairment losses. Revaluations are made and are re-assessed when new indices are published by the Valuer General to ensure that the carrying amounts do not materially differ from their fair values;
- the fair value of assets other than land is generally based on their depreciated replacement value.

Judgements, estimates and assumptions are required to be made about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on professional judgements derived from historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

Note 1: Summary of significant accounting policies (continued)

(c) Basis of accounting preparation and measurement (continued)

Revisions to accounting estimates are recognised in the period in which the estimate is revised and also in future periods that are affected by the revision. Judgements and assumptions made by management in the application of AASBs that have significant effects on the financial statements and estimates relate to:

- the fair value of land, buildings, plant and equipment, (refer to Note 7.1);
- actuarial assumptions for employee benefit provisions based on likely tenure of existing staff, patterns of leave claims, future salary movements and future discount rates (refer to Note 3.2)
- As part of the PP&E valuation, PP&E values were separated into components and each component assessed for its useful life (refer to Note 4.4)

(d) Principles of consolidation

Intersegment Transactions

Transactions between segments within Maldon Hospital have been eliminated to reflect the extent of Maldon Hospital's operations as a group.

Jointly Controlled Assets or Operations

Interests in jointly controlled assets or operations are not consolidated by Maldon Hospital. The Loddon Mallee Health Alliance (the Alliance) has been accounted for using the Joint Operations method under AASB 11 Joint Arrangements.

Investments in joint operations

In respect of any interest in joint operations, Maldon Hospital recognises in the financial statements:

- its assets, including its share of any assets held jointly;
- any liabilities including its share of liabilities that it had incurred;
- its revenue from the sale of its share of the output from the joint operation;
- its share of the revenue from the sale of the output by the operation; and
- its expenses, including its share of any expenses incurred jointly.

Note 2: Funding delivery of our services

Maldon Hospital's overall objective is to deliver programs and services that support and enhance the wellbeing of all Victorians.

To enable the hospital to fulfil its objective it receives income based on parliamentary appropriations. The hospital also receives income from the supply of services.

Department of Health and Human Services makes certain payments on behalf of the Health Service. These amounts have been brought to account in determining the operating result for the year by recording them as revenue and expenses.

Note 2.1: Analysis of Revenue by Source (continued)

Income is recognised in accordance with AASB 118 Revenue and is recognised as to the extent that it is probable that the economic benefits will flow to Maldon Hospital and the income can be reliably measured at fair value. Unearned income at reporting date is reported as income received in advance.

Amounts disclosed as revenue are where applicable, net of returns, allowances and duties and taxes.

Government Grants and other transfers of income (other than contributions by owners)

In accordance with AASB 1004 Contributions, government grants and other transfers of income (other than contributions by owners) are recognised as income when the Health Service gains control of the underlying assets irrespective of whether conditions are imposed on the Health Service's use of the contributions.

Contributions are deferred as income in advance when the Health Service has a present obligation to repay them and the present obligation can be reliably measured.

Indirect Contributions from the Department of Health and Human Services

- Insurance is recognised as revenue following advice from the Department of Health and Human Services.
- Long Service Leave (LSL) – Revenue is recognised upon finalisation of movements in LSL liability in line with the arrangements set out in the Metropolitan Health and Aged Care Services Division Hospital Circular 04/2017.

Donations and Other Bequests

Donations and bequests are recognised as revenue when received. If donations are for a special purpose, they may be appropriated to a surplus, such as the specific restricted purpose surplus.

Interest Revenue

Interest revenue is recognised on a time proportionate basis that takes in account the effective yield of the financial asset, which allocates interest over the relevant period.

Other income

Other income includes non-property rental, dividends, forgiveness of liabilities, and bad debt reversals.

Category groups

- The Maldon Hospital has used the following category groups for reporting purposes for the current and previous financial years.
- Non Admitted Services comprises acute and subacute non admitted services, where services are delivered in public hospital clinics and provide models of integrated community care, which significantly reduces the demand for hospital beds and supports the transition from hospital to home in a safe and timely manner.
- Aged Care comprises a range of in home, specialist geriatric, residential care and community based programs and support services, such as Home and Community Care (HACC) that are targeted to older people, people with a disability, and their carers.
- Residential Aged Care including Mental Health (RAC incl. Mental Health) referred to in the past as psychogeriatric residential services, comprises those Commonwealth-licensed residential aged care services in receipt of supplementary funding from the department under the mental health program. It excludes all other residential services funded under the mental health program, such as mental health funded community care units and secure extended care units.
- Other Services not reported elsewhere - (Other) comprises services not separately classified above, includes: Health and Community Initiatives.

Note 3: The cost of delivering our services

This section provides an account of the expenses incurred by the hospital in delivering services and outputs. In Section 2, the funds that enable the provision of services were disclosed and in this note the cost associated with provision of services are recorded.

Note 3.1: Analysis of Expenses by Source (continued)

Expenses are recognised as they are incurred and reported in the financial year to which they relate.

Cost of goods sold

Costs of goods sold are recognised when the sale of an item occurs by transferring the cost or value of the item/s from inventories.

Employee expenses include:

- wages and salaries;
- fringe benefits tax;
- leave entitlements;
- termination payments;
- workcover premiums; and
- superannuation expenses which are reported differently depending upon whether employees are members of defined benefit or defined contribution plans.

Other operating expenses

Other operating expenses generally represent the day-to-day running costs incurred in normal operations and include:

Supplies and consumables

Supplies and services costs which are recognised as an expense in the reporting period in which they are incurred. The carrying amounts of any inventories held for distribution are expensed when distributed.

Bad and doubtful debts

Refer to Note 4.1 Investments and other financial assets.

Fair value of assets, services and resources provided free of charge or for nominal consideration

Contributions of resources provided free of charge or for nominal consideration are recognised at their fair value when the transferee obtains control over them, irrespective of whether restrictions or conditions are imposed over the use of the contributions, unless received from another agency as a consequence of a restructuring of administrative arrangements. In the latter case, such a transfer will be recognised at its carrying amount.

Contributions in the form of services are only recognised when a fair value can be reliably determined and the services would have been purchased if not donated.

Other economic flows are changes in the volume or value of assets or liabilities that do not result from transactions.

Net gain/ (loss) on non-financial assets

Net gain/ (loss) on non-financial assets and liabilities includes realised and unrealised gains and losses as follows

Revaluation gains/ (losses) of non-financial physical assets

Refer to Note 4.3 Property plant and equipment.

Net gain/ (loss) on disposal of non-financial assets

Any gain or loss on the disposal of non-financial assets is recognised at the date of disposal and is the difference between the proceeds and the carrying amount of the asset at the time.

Net gain/ (loss) on financial instruments

Net gain/ (loss) on financial instruments includes:

- realised and unrealised gains and losses from revaluations of financial instruments at fair value;
- impairment and reversal of impairment for financial instruments at amortised cost refer to Note 4.1 Investments and other financial assets; and
- disposals of financial assets and derecognition of financial liabilities

Revaluations of financial instrument at fair value

Refer to Note 7.1 Financial instruments.

Share of net profits/ (losses) of associates and jointly controlled entities, excluding dividends.

Refer to Note 1 (d) Principles of consolidation.

Other gains/ (losses) from other economic flows

Other gains/ (losses) include:

- the revaluation of the present value of the long service leave liability due to changes in the bond rate movements, inflation rate movements and the impact of changes in probability factors; and
- transfer of amounts from the reserves to accumulated surplus or net result due to disposal or derecognition or reclassification.

Settlement made during the year	(64,708)	(83,554)
Balance at end of year	367,100	395,776

Note 3.2: Employee benefits in the balance sheet (continued)

Provisions

Provisions are recognised when the Health Service has a present obligation, the future sacrifice of economic benefits is probable, and the amount of the provision can be measured reliably.

The amount recognised as a liability is the best estimate of the consideration required to settle the present obligation at reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows, using a discount rate that reflects the time value of money and risks specific to the provision.

When some or all of the economic benefits required to settle a provision are expected to be received from a third party, the receivable is recognised as an asset if it is virtually certain that recovery will be received and the amount of the receivable can be measured reliably.

Employee benefits

This provision arises for benefits accruing to employees in respect of wages and salaries, annual leave and long service leave for services rendered to the reporting date.

Wages and salaries, annual leave, and accrued days off

Liabilities for wages and salaries, including non-monetary benefits, annual leave, and accrued days off are all recognised in the provision for employee benefits as 'current liabilities', because the health service does not have an unconditional right to defer settlements of these liabilities.

Depending on the expectation of the timing of settlement, liabilities for wages and salaries, annual leave and accrued days off are measured at:

- Undiscounted value – if the health service expects to wholly settle within 12 months; or
- Present value – if the health service does not expect to wholly settle within 12 months.

Long service leave (LSL)

Liability for LSL is recognised in the provision for employee benefits.

Unconditional LSL is disclosed in the notes to the financial statements as a current liability, even where the health service does not expect to settle the liability within 12 months because it will not have the unconditional right to defer the settlement of the entitlement should an employee take leave within 12 months. An unconditional right arises after a qualifying period.

The components of this current LSL liability are measured at:

- Undiscounted value – if the health service expects to wholly settle within 12 months; and
- Present value – where the entity does not expect to settle a component of this current liability within 12 months.

Conditional LSL is disclosed as a non-current liability. There is an unconditional right to defer the settlement of the entitlement until the employee has completed the requisite years of service. This non-current LSL liability is measured at present value.

Any gain or loss followed revaluation of the present value of non-current LSL liability is recognised as a transaction, except to the extent that a gain or loss arises due to changes in estimations e.g. bond rate movements, inflation rate movements and changes in probability factors which are then recognised as other economic flow.

Termination benefits

Termination benefits are payable when employment is terminated before the normal retirement date or when an employee decides to accept an offer of benefits in exchange for the termination of employment.

The health service recognises termination benefits when it is demonstrably committed to either terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal or providing termination benefits as a result of an offer made to encourage voluntary redundancy.

On-costs related to employee expense

Provision for on-costs, such as workers compensation and superannuation are recognised together with provisions for employee benefits.

Note 3.3: Superannuation

	Paid Contribution for the Year		Contribution Outstanding at Year End	
	2017 \$	2016 \$	2017 \$	2016 \$
Defined contribution plans:				
First State Super	188,814	195,473	2,637	0
HESTA	50,443	50,413	704	0
Other	13,837	1,067	193	0
Total	253,094	246,953	3,534	0

Employees of the Health Service are entitled to receive superannuation benefits and the Health Services contributes to only defined contribution plans.

However superannuation contributions paid or payable for the reporting period are included as part of employee benefits in the comprehensive operating statement of the Health Service.

The name, details and amounts expensed in relation to the major employee superannuation funds and contributions made by the Health Service is disclosed in the table above.

Note 4: Key Assets to support service delivery

The hospital controls infrastructure and other investments that are utilised in fulfilling its objectives and conducting its activities. They represent the key resources that have been entrusted to the hospital to be utilised for delivery of those outputs.

(a) Ageing analysis of investments and other financial assets

Please refer to note 7.1 (c) for the ageing analysis of investments and other financial assets

(b) Nature and extent of risk arising from investments and other financial assets

Please refer to note 7.1 (c) for the nature and extent of credit risk arising from investments and other financial assets

Investments and other financial assets

Hospital investments must be in accordance in Standing Direction 3.7.2 – Treasury and Investment Risk Management. Investments are recognised and derecognised on trade date where purchase or sale of an investment is under a contract whose terms require delivery of the investment within the timeframe established by the market concerned, and are initially measured at fair value, net of transaction costs.

Investments are classified in the following categories:

- financial assets at fair value through profit or loss;
- loans and receivables; and
- available-for-sale financial assets.

The Maldon Hospital classifies its other financial assets between current and non-current assets based on the purpose for which the assets were acquired. Management determines the classification of its other financial assets at initial recognition.

Maldon Hospital assesses at each balance sheet date whether a financial asset or group of financial assets is impaired. All financial assets, except those measured at fair value through profit or loss are subject to annual review for impairment.

Note 4.1: Investments and other Financial Assets (continued)

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired; or
- the Health Service retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass through' arrangement; or
- the Health Service has transferred its rights to receive cash flows from the asset and either:
 - (a) has transferred substantially all the risks and rewards of the asset; or
 - (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Health Service has neither transferred nor retained substantially all the risks and rewards or transferred control, the asset is recognised to the extent of the Health Service's continuing involvement in the asset.

Impairment of financial assets

At the end of each reporting period, Maldon Hospital management assesses whether there is objective evidence that a financial asset or group of financial assets is impaired. All financial instrument assets, except those measured at fair value through profit or loss, are subject to annual review for impairment.

The allowance is the difference between the financial asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. In assessing impairment of statutory (non-contractual) financial assets, which are not financial instruments, professional judgement is applied in assessing materiality using estimates, averages and other computational methods in accordance with AASB 136 *Impairment of Assets*.

Doubtful debts

Receivables are assessed for bad and doubtful debts on a regular basis. Those bad debts considered as written off by mutual consent are classified as a transaction expense. Bad debts not written off by mutual consent and the allowance for doubtful debts are classified as other economic flows in the net result.

Note 4.2: Jointly Controlled Operations and Assets

Name of Entity	Principal Activity	Country of Incorporation	Ownership Interest

Land and buildings carried at valuation

An independent valuation of Maldon Hospital's land and buildings was performed by *the Valuer-General Victoria* to determine the fair value of the land and buildings. The valuation, which conforms to Australian Valuation Standards, was determined by reference to the amounts for which assets could be exchanged between knowledgeable willing parties in an arm's length transaction. The valuation was based on independent assessments. The effective date of the valuation is 30 June 2014. A managerial revaluation for the land was completed on the 30th June 2017, in accordance with FRD 103F.

Note 4.3: Property, plant & equipment (continued)

Note

⁽¹⁾ Classified in accordance with the fair value hierarchy.

⁽ⁱⁱ⁾ Vehicles are categorised to Level 3 assets if the depreciated replacement cost is used in estimating the fair value.

There have been no transfers between levels during the period.

Note 4.3: Property, plant & equipment (continued)

(c) Fair value measurement hierarchy for assets (continued)

Consistent with AASB 13 Fair Value Measurement, Maldon Hospital determines the policies and procedures for both recurring fair value measurements such as property, plant and equipment, investment properties and financial instruments, and for non-recurring fair value measurements such as non-financial physical assets held for sale, in accordance with the requirements of AASB 13 and the relevant FRDs.

Valuation hierarchy

Health Services need to use valuation techniques that are appropriate for the circumstances and where there is sufficient data available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For the purpose of fair value disclosures, Maldon Hospital has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

In addition, Maldon Hospital determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Valuer-General Victoria (VGV) is Maldon Hospital's independent valuation agency.

Maldon Hospital, in conjunction with VGV monitors the changes in the fair value of each asset and liability through relevant data sources to determine whether revaluation is required.

The estimates and underlying assumptions are reviewed on an ongoing basis.

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the following assumptions:

- that the transaction to sell the asset or transfer the liability takes place either in the principal market (or the most advantageous market, in the absence of the principal market), either of which must be accessible to the Health Service at the measurement date;
- that the Health Service uses the same valuation assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

Consideration of highest and best use (HBU) for non-financial physical assets

Judgements about highest and best use must take into account the characteristics of the assets concerned, including restrictions on the use and disposal of assets arising from the asset's physical nature and any applicable legislative/contractual arrangements.

In considering the HBU for non-financial physical assets, valuers are probably best placed to determine highest and best use (HBU) in consultation with Health Services. Health Services and their valuers therefore need to have a shared understanding of the circumstances of the assets. A Health Service has to form its own view about a valuer's determination, as it is ultimately responsible for what is presented in its audited financial statements.

In accordance with paragraph AASB 13.29, Health Services can assume the current use of a non-financial physical asset is its HBU unless market or other factors suggest that a different use by market participants would maximise the value of the asset.

Therefore, an assessment of the HBU will be required when the indicators are triggered within a reporting period, which suggest the market participants would have perceived an alternative use of an asset that can generate maximum value. Once identified, Health Services are required to engage with VGV or other independent valuers for formal HBU assessment.

These indicators, as a minimum, include:

External factors:

- Changed acts, regulations, local law or such instrument which affects or may affect the use or development of the asset;
- Changes in planning scheme, including zones, reservations, overlays that would affect or remove the restrictions imposed on the asset's use from its past use;
- Evidence that suggest the current use of an asset is no longer core to requirements to deliver a Health Service's service obligation;
- Evidence that suggests that the asset might be sold or demolished at reaching the late stage of an asset's life cycle.

In addition, Health Services need to assess the HBU as part of the 5-year review of fair value of non-financial physical assets. This is consistent with the current requirements on FRD 103F Non-financial physical assets.

Identifying unobservable inputs (level 3) fair value measurements

Level 3 fair value inputs are unobservable valuation inputs for an asset or liability. These inputs require significant judgement and assumptions in deriving fair value for both financial and non-financial assets.

Unobservable inputs shall be used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, i.e., an exit price at the measurement date from the perspective of a market participant that holds the asset or owes the liability. Therefore, unobservable inputs shall reflect the assumptions that market participants would use when pricing the asset or liability, including assumptions about risk.

Assumptions about risk include the inherent risk in a particular valuation technique used to measure fair value (such as a pricing risk model) and the risk inherent in the inputs to the valuation technique. A measurement that does not include an adjustment for risk would not represent a fair value measurement if market participants would include one when pricing the asset or liability i.e., it might be necessary to include a risk adjustment when there is significant measurement uncertainty. For example, when there has been a significant decrease in the volume or level of activity when compared with normal market activity for the asset or liability or similar assets or liabilities, and the Health Service has determined that the transaction price or quoted price does not represent fair value.

Note 4.3: Property, plant & equipment (continued)

(d) Reconciliation of Level 3 fair value (continued)

A Health Service shall develop unobservable inputs using the best information available in the circumstances, which might include the Health Service's own data. In developing unobservable inputs, a Health Service may begin with its own data, but it shall adjust this data if reasonably available information indicates that other market participants would use different data or there is something particular to the Health Service that is not available to other market participants. A Health Service need not undertake exhaustive efforts to obtain information about other market participant assumptions. However, a Health Service shall take into account all information about market participant assumptions that is reasonably available. Unobservable inputs developed in the manner described above are considered market participant assumptions and meet the object of a fair value measurement.

Specialised land and specialised buildings

The market approach is also used for specialised land and specialised buildings although is adjusted for the community service obligation (CSO) to reflect the specialised nature of the assets being valued. Specialised assets contain significant, unobservable adjustments; therefore these assets are classified as Level 3 under the market based direct comparison approach.

The CSO adjustment is a reflection of the valuer's assessment of the impact of restrictions associated with an asset to the extent that is also equally applicable to market participants. This approach is in light of the highest and best use consideration required for fair value measurement, and takes into account the use of the asset that is physically possible, legally permissible and financially feasible. As adjustments of CSO are considered as significant unobservable inputs, specialised land would be classified as Level 3 assets.

For the health services, the depreciated replacement cost method is used for the majority of specialised buildings, adjusting for the associated depreciation. As depreciation adjustments are considered as significant and unobservable inputs in nature, specialised buildings are classified as Level 3 for fair value measurements.

An independent valuation of the Health Service's specialised land and specialised buildings was performed by the Valuer-General Victoria. The valuation was performed using the market approach adjusted for CSO. The effective date of the valuation is 30 June 2014. A managerial revaluation for the land was completed on the 30th June 2017, in accordance with FRD 103F.

Vehicles

Maldon Hospital acquires new vehicles and at times disposes of them before completion of their economic life. The process of acquisition, use and disposal in the market is managed by Maldon Health who set relevant depreciation rates during use to reflect the consumption of the vehicles. As a result, the fair value of vehicles does not differ materially from the carrying value (depreciation cost).

Plant and equipment

Plant and equipment is held at carrying amount (depreciated cost). When plant and equipment is specialised in use, such that it is rarely sold other than as part of a going concern, the depreciated replacement cost is used to estimate the fair value. Unless there is market evidence that current replacement costs are significantly different from the original acquisition cost, it is considered unlikely that depreciated replacement cost will be materially different from the existing carrying amount.

There were no changes in valuation techniques throughout the period to 30 June 2017.

For all assets measured at fair value, the current use is considered the highest and best use.

(e) Description of significant unobservable inputs to Level 3 valuations:

	Valuation technique	Significant unobservable inputs
Specialised land	Market approach	Community Service Obligation (CSO) adjustment Valuer-General Victoria vacant land indexation factors
Specialised buildings	Depreciated replacement cost	Direct cost per square metre Useful life of specialised buildings
Plant and equipment at fair value	Depreciated replacement cost	Cost per unit Useful life of PPE
Vehicles	Depreciated replacement cost	Cost per unit Useful life of vehicles

Refer to note 7.2 for guidance on fair value measurement indicative expectations.

Note 4.3: Property, plant & equipment (continued)

(e) Description of significant unobservable inputs to Level 3 valuations (continued)

Property, plant and equipment

All non-current physical assets are measured initially at cost and subsequently revalued at fair value less accumulated depreciation and accumulated impairment loss. Where an asset is acquired for no or nominal cost, the cost is its fair value at the date of acquisition. Assets transferred as part of a merger/machinery of government are transferred at their carrying amount.

More details about the valuation techniques and inputs used in determining the fair value of non-financial physical assets are discussed in Note 4.3.

The initial cost for non-financial physical assets under finance lease is measured at amounts equal to the fair value of the leased asset or, if lower, the present value of the minimum lease payments, each determined at the inception of the lease.

Crown land is measured at fair value with regard to the property's highest and best use after due consideration is made for any legal or physical restrictions imposed on the asset, public announcements or commitments made in relation to the intended use of the asset. Theoretical opportunities that may be available in relation to the asset(s) are not taken into account until it is virtually certain that any restrictions will no longer apply. Therefore, unless otherwise disclosed, the current use of these non-financial physical assets will be their highest and best uses.

Land and buildings are recognised initially at cost and subsequently measured at fair value less accumulated depreciation and accumulated impairment loss.

Plant, equipment and vehicles are recognised initially at cost and subsequently measured at fair value less accumulated depreciation and accumulated impairment loss. Depreciated historical cost is generally a reasonable proxy for fair value because of the short lives of the assets concerned.

Revaluations of non-current physical assets

Non-current physical assets are measured at fair value and are revalued in accordance with FRD 103F *Non-current physical assets*. This revaluation process normally occurs at least every five years, based upon the asset's Government Purpose Classification, but may occur more frequently if fair value assessments indicate material changes in values. Independent valuers are used to conduct these scheduled revaluations and any interim revaluations are determined in accordance with the requirements of the FRDs. Revaluation increments or decrements arise from differences between an asset's carrying amount and fair value. A managerial revaluation for the land was completed on the 30th June 2017.

Revaluation increments are recognised in 'other comprehensive income' and are credited directly in equity to the asset revaluation surplus, except that, to the extent that an increment reverses a revaluation decrement in respect of that same class of asset previously recognised as an expense in net result, the increment is recognised as income in the net result.

Revaluation decrements are recognised in 'other comprehensive income' to the extent that a credit balance exists in the asset revaluation surplus in respect of the same class of property, plant and equipment.

Revaluation increases and revaluation decreases relating to individual assets within an asset class are offset against one another within that class but are not offset in respect of assets in different classes.

Revaluation surplus is not normally transferred to accumulated funds on derecognition of the relevant asset.

In accordance with FRD 103F, Maldon Hospital's non-current physical assets were assessed to determine whether revaluation of the non-current physical assets was required.

Note 4.4: Depreciation

	2017	2016
	\$	\$
Depreciation		
Buildings	276,494	273,642
Plant & Equipment	52,094	43,569
Motor Vehicles	7,274	6,964
LMRHA Joint Operation Depreciation	1,926	3,958
Total Depreciation	337,788	328,133

All buildings, plant and equipment and other non-financial physical assets that have finite useful lives are depreciated (i.e. excludes land assets held for sale, and investment properties). Depreciation begins when the asset is available for use, which is when it is in the location and condition necessary for it to be capable of operating in a manner intended by management.

Depreciation is generally calculated on a straight line basis, at a rate that allocates the asset value, less any estimated residual value over its estimated useful life. Estimates of the remaining useful lives, residual value and depreciation method for all assets are reviewed at least annually, and adjustments made where appropriate. This depreciation charge is not funded by the Department of Health and Human Services. Assets with a cost in excess of \$1,000 are capitalised and depreciation has been provided on depreciable assets so as to allocate their cost or valuation over their estimated useful lives.

The following table indicates the expected useful lives of non-current assets on which the depreciation charges are based.

	2017	2016
Buildings		
- Structure Shell Building Fabric	45 to 50 years	45 to 50 years
- Site Engineering Services and Central Plant	30 to 40 years	30 to 40 years
- Fit Out	20 to 25 years	20 to 25 years
- Trunk Reticulated Building Systems	20 to 25 years	20 to 25 years
Plant & Equipment	3 to 10 years	3 to 10 years
Medical Equipment	7 to 10 years	7 to 10 years
Computers and Communication	3 years	3 years
Furniture and Fitting	10 years	10 years
Motor Vehicles	8 years	8 years

Note 5: Other Assets and Liabilities

This section sets out those assets and liabilities that arose from the Maldon Hospital's operations.

Note 5.1: Receivables

	2017 \$	2016 \$
CURRENT		
Contractual		
Trade Debtors	10,152	4,809
Patient and resident fees	33,444	6,399
Accrued Investment Income	52,267	56,587
Accrued Revenue - Other	218,288	2,190
LMRHA Joint Operation Receivables	2,850	2,489
	317,001	72,474
Statutory

Long Service Leave - Department of Health and Human Services	241,907	233,471
	241,907	233,471
TOTAL NON-CURRENT RECEIVABLES	241,907	233,471
TOTAL RECEIVABLES	600,293	345,604

Receivables consist of:

- contractual receivables, which includes mainly debtors in relation to goods and services, accrued investment income; and
- statutory receivables, which includes predominantly amounts owing from the Victorian Government and Goods and Services Tax ("GST") input tax credits recoverable.

Receivables that are contractual are classified as financial instruments and categorised as loans and receivables. Statutory receivables are recognised and measured similarly to contractual receivables (except for impairment), but are not classified as financial instruments because they do not arise from a contract.

Receivables are recognised initially at fair value and subsequently measured at amortised cost, using the effective interest method, less any accumulated impairment.

Trade debtors are carried at nominal amounts due and are due for settlement within 30 days from the date of recognition. Collectability of debts is reviewed on an ongoing basis, and debts which are known to be uncollectible are written off. A provision for doubtful debts is recognised when there is objective evidence that the debts may not be collected and bad debts are written off when identified.

(a) Movement in the Allowance for doubtful debts

There are no movements or balances in the allowance for doubtful debts for the current reporting period.

(b) Ageing analysis of receivables

Please refer to note 7.1 (c) for the ageing analysis of contractual receivables.

(c) Nature and extent of risk arising from receivables

Please refer to note 7.1 (c) for the nature and extent of credit risk arising from contractual receivables.

CURRENT		
Prepayments	30,919	25,088
LMRHA Joint Operation Prepayments	9,796	8,004
TOTAL OTHER ASSETS	40,715	33,092

Other non-financial assets include prepayments which represent payments in advance of receipt of goods or services or that part of expenditure made in one accounting period covering a term extending beyond that period.

Note 5.4: Payables

	2017 \$	2016 \$
CURRENT		
Contractual		
Trade Creditors	3,577	48,671
LMRHA Joint Operation Payables	16,819	15,122
Accrued Expenses	102,198	78,092
LMRHA Accrued Expenses	2,225	1,552
	124,819	143,437
Statutory		
GST Payable	1,320	712
FBT Payable	1,582	1,730
PAYG Tax	38,503	43,652
Department of Health and Human Services Grant Recall	57,055	43,446
	98,460	89,540
TOTAL PAYABLES	223,279	232,977

(a) Maturity analysis of payables

Please refer to Note 7.1 (d) for the ageing analysis of contractual payables

(b) Nature and extent of risk arising from payables

Please refer to note 7.1 (d) for the nature and extent of risks arising from contractual payables

Payables consist of:

- contractual payables which consist predominantly of accounts payable representing liabilities for goods and services provided to the Health Service prior to the end of the financial year that are unpaid, and arise when the Health Service becomes obliged to make future payments in respect of the purchase of those goods and services. The normal credit terms for accounts payable are usually Nett 30 days.
- statutory payables, such as goods and services tax and fringe benefits tax payables.

Contractual payables are classified as financial instruments and are initially recognised at fair value, and then subsequently carried at amortised cost. Statutory payables are recognised and measured similarly to contractual payables, but are not classified as financial instruments and not included in the category of financial liabilities at amortised cost, because they do not arise from a contract.

Note 6: How we finance our operations

This section provides information on the sources of finance utilised by the hospital during its operations, along with interest expenses (the cost of borrowings) and other information related to financing activities of the hospital.

Note 6.1: Cash and Cash Equivalents

	2017 \$	2016 \$
Cash on hand	950	750
Cash at bank	903,222	1,525,821
Total Cash and Cash Equivalents	904,172	1,526,571
Represented by:		
Cash for Health Service Operations (as per Cash Flow Statement)	154,545	538,096
Share of Net Cash of Joint Operation (refer Note 4.2)	26,959	2,922
Cash for Monies Held in Trust (refer Note 5.2)		
- Patient Trust Monies	18,526	9,949
- Accommodation Bonds	704,142	975,604
Total Cash and Cash Equivalents	904,172	1,526,571

Cash and cash equivalents recognised on the balance sheet comprise cash on hand and cash at bank, deposits at call and highly liquid investments (with an original maturity of three months or less), which are held for the purpose of meeting short term cash commitments rather than for investment purposes, which are readily convertible to known amounts of cash with an insignificant risk of changes in value.

For cash flow statement presentation purposes, cash and cash equivalents include bank overdrafts, which are included as liabilities on the balance sheet.

Note 6.2: Commitments for expenditure

Contracted capital commitment

Capital commitments and other expenditure commitments contracted for as at the end of the reporting period do not require disclosure where the commitments are for the supply of inventories and have been recognised as liabilities in the balance sheet.

There are no commitments for operating leases, capital or non capital commitments as at 30 June 2017 and 2016.

Note 7: Risks, contingencies & valuation uncertainties

Maldon Hospital is exposed to risk from its activities and outside factors. In addition, it is often necessary to make judgements and estimates associated with recognition and measurement of items in the financial statements. This section sets out financial instrument specific information, (including exposures to financial risks) as well as those items that are contingent in nature or require a higher level of judgement to be applied, which for the hospital is related mainly to fair value determination.

Note 7.1: Financial Instruments

(a) Financial risk management objectives and policies

Maldon Hospital's principal financial instruments comprise of:

- *term deposits*
- *receivables (excluding statutory receivables)*
- *payables (excluding statutory payables)*
- *accommodation bonds*

Details of the significant accounting policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, with respect to each class of financial asset, financial liability and equity instrument are disclosed in the notes to the financial statements.

The Health Service's main financial risks include credit risk, liquidity risk, interest rate risk. The Health Service manages these financial risks in accordance with its financial risk management policy.

The Health Service uses different methods to measure and manage the different risks to which it is exposed. Primary responsibility for the identification and management of financial risks rests with the financial risk management committee of the Health Service.

The main purpose in holding financial instruments is to prudentially manage Maldon Hospital's financial risks within the government policy parameters.

Note 7.1: Financial Instruments (continued)

Total Financial Assets	153,182	153,182

(i) For cash and cash equivalents and loans or receivables, the net gain or loss is calculated by taking the movement in the fair value of the asset and interest revenue, minus any impairment recognised in the net result.

(c) Credit risk

Credit risk arises from the contractual financial assets of the Health Service, which comprise cash and deposits, non-statutory receivables and available for sale contractual financial assets. The Health Service's exposure to credit risk arises from the potential default of a counter party on their contractual obligations resulting in financial loss to the Health Service. Credit risk is measured at fair value and is monitored on a regular basis.

Credit risk associated with the Health Service's contractual financial assets is minimal because the main debtor is the Victorian Government. For debtors other than the Government, it is the Health Service's policy to only deal with entities with high credit ratings of a minimum Triple-B rating and to obtain sufficient collateral or credit enhancements, where appropriate.

In addition, the Health Service does not engage in hedging for its contractual financial assets and mainly obtains contractual financial assets that are on fixed interest, except for cash assets, which are mainly cash at bank. As with the policy for debtors, the Health Service's policy is to only deal with banks with high credit ratings.

Provision of impairment for contractual financial assets is recognised when there is objective evidence that the Health Service will not be able to collect a receivable. Objective evidence includes financial difficulties of the debtor, default payments, debts which are more than 60 days overdue, and changes in debtor credit ratings.

Except as otherwise detailed in the following table, the carrying amount of contractual financial assets recorded in the financial statements, net of any allowances for losses, represents Maldon Hospital's maximum exposure to credit risk without taking account of the value of any collateral obtained.

(i) Ageing analysis of financial assets excludes types of statutory financial assets (i.e GST input tax credit)

Contractual Financial Assets that are either past due or impaired

There are no material financial assets which are individually determined to be impaired. Currently the Health Service does not hold any collateral as security nor credit enhancements relating to its financial assets.

There are no financial assets that have had their terms renegotiated so as to prevent them from being past due or impaired, and the are stated at their carrying amounts as indicated. The ageing analysis table above discloses the ageing only of contractual financial assets that are past due but not impaired.

Note 7.1: Financial Instruments (continued)

(d) Liquidity risk

Liquidity risk is the risk that the Health Service would be unable to meet its financial obligations as and when they fall due. The Health Services operates under the Government's fair payments policy of settling financial obligations within 30 days and in the event of a dispute, making payments within 30 days from the date of resolution.

The Health Service's maximum exposure to liquidity risk is the carrying amounts of financial liabilities as disclosed in the face of the balance sheet. The Health Service manages its liquidity risk as follows:

- Maximising interest rates, and
- Having better collection and payment processes.

The following table discloses the contractual maturity analysis for Maldon Hospital's financial liabilities. For interest rates applicable to each class of liability refer to individual notes to the financial statements.

Maturity analysis of Financial Liabilities as at 30 June

	Carrying Amount \$	Nominal Amount \$	Maturity Dates			
			Less than 1 Month \$	1-3 Months \$	3 months - 1 Year \$	1-5 Years \$

(i) Ageing analysis of financial liabilities excludes the types of statutory financial liabilities (i.e GST payable)

(e) Market risk

The Maldon Hospital's exposures to market risk are primarily through interest rate risk with only insignificant exposure to foreign currency and other price risks. Objectives, policies and processes used to manage each of these risks are disclosed in the paragraph below.

Interest rate risk

Exposure to interest rate risk might arise primarily through the Maldon Hospital's interest bearing liabilities. Minimisation of risk is achieved by mainly undertaking fixed rate or non-interest bearing financial instruments. For financial liabilities, the health service mainly undertake financial liabilities with relatively even maturity profiles.

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest

The Health Service has minimal exposure to cash flow interest rate risks through its cash and deposits, term deposits and bank overdrafts that are at floating rate.

The Health Service manages this risk by mainly undertaking fixed rate or non-interest bearing financial instruments with relatively even maturity profiles, with only insignificant amounts of financial instruments at floating rate. Management has concluded for cash at bank and bank overdraft, as financial assets that can be left at floating rate without necessarily exposing the Health Service to significant bad risk, management monitors movement in interest rates on a daily basis.

Note 7.1: Financial Instruments (continued)

(e) Market risk (Continued)

Other price risk

The Health Service is exposed to price risk in respect of fee for service and contract services which are open to market competition. There has been no significant change in the Health Service's exposure, or its objectives, policies and processes for managing risk or the methods used to measure the risk from the previous reporting period.

Interest rate exposure of financial assets and liabilities as at 30 June

Sensitivity disclosure analysis

Taking into account past performance, future expectations, economic forecasts, and management's knowledge and experience of the financial markets, the Maldon Hospital believes the following movements are 'reasonably possible' over the next 12 months (Base rates are sourced from the Reserve Bank of Australia)

- A shift of +1% and -1% in market interest rates (AUD) from year-end rates of 1.5%
- A parallel shift of +1% and -1% in inflation rate from year-end rates of 2%

The following table discloses the impact on net operating result and equity for each category of financial instrument held by Maldon Hospital at year end as presented to key management personnel, if changes in the relevant risk occur.

Note 7.1: Financial Instruments (continued)

(f) Fair value

The fair values and net fair values of financial instrument assets and liabilities are determined as follows:

- Level 1 - the fair value of financial instrument with standard terms and conditions and traded in active liquid markets are determined with reference to quoted market prices;
- Level 2 - the fair value is determined using inputs other than quoted prices that are observable for the financial asset or liability, either directly or indirectly; and
- Level 3 - the fair value is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using unobservable market inputs.

The Health Services considers that the carrying amount of financial instrument assets and liabilities recorded in the financial statements to be a fair approximation of their fair values, because of the short-term nature of the financial instruments and the expectation that they will be paid in full.

The following table shows that the fair values of most of the contractual financial assets and liabilities are the same as the carrying amounts.

Comparison between carrying amount and fair value

	Carrying Amount	Fair value	Carrying Amount	Fair value
	2017	2017	2016	2016
	\$	\$	\$	\$

(i) The carrying amount excludes statutory financial assets and liabilities (i.e. GST input tax credit and GST payable).

Note 7.1: Financial Instruments (continued)

Financial instruments arise out of contractual agreements that give rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Due to the nature of the Maldon Hospital activities, certain financial assets and financial liabilities arise under statute rather than a contract. Such financial assets and financial liabilities do not meet the definition of financial instruments in AASB 132 Financial Instruments: Presentation. For example, statutory receivables arising from taxes, fines and penalties do not meet the definition of financial instruments as they do not arise under contract.

Where relevant, for note disclosure purposes, a distinction is made between those financial assets and financial liabilities that meet the definition of financial instruments in accordance with AASB 132 and those that do not.

The following refers to financial instruments unless otherwise stated.

Categories of non-derivative financial instruments

Financial assets and liabilities at fair value through profit or loss

Financial assets are categorised as fair value through profit or loss at trade date if they are classified as held for trading or designated as such upon initial recognition. Financial instrument assets are designated at fair value through profit or loss on the basis that the financial assets form part of a group of financial assets that are managed by the Health Service concerned based on their fair values, and have their performance evaluated in accordance with documented risk management and investment strategies.

Financial instruments at fair value through profit or loss are initially measured at fair value and attributable transaction costs are expensed as incurred. Subsequently, any changes in fair value are recognised in the net result as other comprehensive income, as required by AASB 139 para 55. Any dividend or interest on a financial asset is recognised in the net result for the year.

Financial assets and liabilities at fair value through profit or loss include the majority of the Health Service's equity investments, debt securities and borrowings.

Reclassification of financial instruments at fair value through profit or loss

Financial instrument assets that meet the definition of loans and receivables may be reclassified out of the fair value through profit or loss category into the loans and receivables category, where they would have met the definition of loans and receivables had they not been required to be classified as fair value through profit or loss. In these cases, the financial instrument assets may be reclassified out of the fair value through profit or loss category, if there is the intention and ability to hold them for the foreseeable future or until maturity.

Loans and receivables

Loans and receivables are financial instrument assets with fixed and determinable payments that are not quoted on an active market. These assets are initially recognised at fair value plus any directly attributable transaction costs. Subsequent to initial measurement, loans and receivables are measured at amortised cost using the effective interest method, less any impairment.

Loans and receivables category includes cash and deposits (refer to Note 6.1), term deposits with maturity greater than three months, trade receivables, loans and other receivables, but not statutory receivables.

Financial liabilities at amortised cost

Financial instrument liabilities are initially recognised on the date they are originated. They are initially measured at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, these financial instruments are measured at amortised cost with any difference between the initial recognised amount and the redemption value being recognised in profit or loss over the period of the interest-bearing liability, using the effective interest rate method.

Financial instrument liabilities measured at amortised cost include all of the Health Service's contractual payables, deposits held and advances received, and interest-bearing arrangements other than those designated at fair value through profit or loss.

Net gain/(loss) on financial instruments

Net gain/(loss) on financial instruments includes:

- realised and unrealised gains and losses from revaluations of financial instruments that are designated at fair value through profit or loss or held-for-trading;
- impairment and reversal of impairment for financial instruments at amortised cost; and
- disposals of financial assets and derecognition of financial liabilities.

Revaluations of financial instruments at fair value

The revaluation gain/(loss) on financial instruments at fair value excludes dividends or interest earned on financial assets.

Note 7.2: Net Gain/(Loss) on Disposal of Non-Financial Assets

Disposal of non-financial assets

Any gain or loss on the sale of non-financial assets is recognised in the comprehensive operating statement. Refer to Note 8.1.

Impairment of non-financial assets

All other non-financial assets are assessed annually for indications of impairment are inventories

If there is an indication of impairment, the assets concerned are tested as to whether their carrying amount exceeds their possible recoverable amount. Where an asset's carrying amount exceeds its recoverable amount, the difference is written-off as an expense except to the extent that the write-down can be debited to an asset revaluation surplus amount applicable to that same class of asset.

If there is an indication that there has been a reversal in the estimate of an asset's recoverable amount since the last impairment loss was recognised, the carrying amount shall be increased to its recoverable amount. This reversal of the impairment loss occurs only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised in prior years.

It is deemed that, in the event of the loss or destruction of an asset, the future economic benefits arising from the use of the asset will be replaced unless a specific decision to the contrary has been made. The recoverable amount for most assets is measured at the higher of depreciated replacement cost and fair value less costs of disposal. Recoverable amount for assets held primarily to generate net cash inflows is measured at the higher of the present value of future cash flows expected to be obtained from the asset and fair value less costs of disposal.

Note 7.3: Contingent assets and contingent liabilities

Maldon Hospital has no contingent assets and contingent liabilities as at 30 June 2016 or 30 June 2017.

Note 7.4: Fair value determination

Asset class	Examples of types of assets	Expected fair value level	Likely valuation approach	Significant inputs (Level 3 only)
Specialised land	Land subject to restrictions as to use and/or sale Land in areas where there is not an active market	Level 3	Market approach	CSO adjustments
Specialised buildings ⁽ⁱ⁾	Specialised buildings with limited alternative uses and/or substantial customisation e.g. prisons, hospitals, and schools	Level 3	Depreciated replacement cost approach	Cost per square metre Useful life
Plant and equipment ⁽ⁱ⁾	Specialised items with limited alternative uses and/or substantial customisation	Level 3	Depreciated replacement cost approach	Cost per square metre Useful life
Vehicles	If there is an active resale market available; If there is no active resale market available	Level 2 Level 3	Market approach Depreciated replacement cost approach	N/A Cost per square metre Useful life

⁽ⁱ⁾ Newly built / acquired assets could be categorised as Level 2 assets as depreciation would not be a significant unobservable input (based on the 10% materiality threshold)

Balance at the end of the reporting period	54,440	876
Total Equity at end of financial year	12,069,269	11,967,095

(1) The property, plant & equipment asset revaluation surplus arises on the revaluation of property, plant & equipment.

Note 8.1: Equity (continued)

Contributed capital

Consistent with Australian Accounting Interpretation 1038 Contributions by Owners Made to Wholly-Owned Public Sector Entities and FRD 119A Contributions by Owners, appropriations for additions to the net asset base have been designated as contributed capital. Other transfers that are in the nature of contributions to or distributions by owners that have been designated as contributed capital are also treated as contributed capital.

Transfers of net assets arising from administrative restructurings are treated as contributions by owners. Transfers of net liabilities arising from administrative restructures are to go through the comprehensive operating statement.

Property, plant & equipment revaluation surplus

The asset revaluation surplus is used to record increments and decrements on the revaluation of non-current physical assets.

Specific restricted purpose surplus

A specific restricted purpose surplus is established where the Health Service has possession or title to the funds but has no discretion to amend or vary the restriction and/or condition underlying the funds received.

Business Segments

Residential Aged Care Services (RACS)

Acute

Services

Provider of residential aged care beds

Provider of acute care

Geographical Segment

Maldon Hospital operates predominantly in Maldon, Victoria. More than 90% of revenue, net surplus from ordinary activities and segment assets relate to operations in Maldon, Victoria.

During the year ending 30th June 2017, Maldon Hospital has refined its basis of allocations between its programs/segments.

Note 8.4: Responsible Persons Disclosures

In accordance with the Ministerial Directions issued by the Minister for Finance under the *Financial Management Act 1994*, the following disclosures are made regarding responsible persons for the reporting period.

Responsible Ministers:

The Honourable Jill Hennessy, Minister for Health, Minister for Ambulance Services

The Honourable Martin Foley, Minister for Housing, Disability and Ageing, Minister for Mental Health

Governing Boards

Dr Helen McBurney

Mr Stephen Gardner

Mrs Julie Green

Mrs Vanessa Healy

Mr Garry Johnstone

Mrs Pam Millwood

Ms Cindy Schultz-Ferguson

Mr Ian Slattery

Mr Colin Thornton

Accountable Officers

Mr Ian Fisher

	1/7/2016 - 30/6/2017
	1/7/2016 - 30/6/2017
	1/7/2016 - 30/8/2016
	1/7/2016 - 30/6/2017
	1/7/2016 - 30/6/2017

Remuneration of Responsible Persons

The number of Responsible Persons are shown in their relevant income bands;

Income Band

\$0 - \$9,999

Total Numbers

Total remuneration received or due and receivable by Responsible Persons from the reporting entity amounted to:

	2017 No.	2016 No.
	9	8
	9	8
	\$0.00	\$0.00

Amounts relating to Responsible Ministers are reported in the financial statements of the Department of Parliamentary Services.

Other Transactions of Responsible Persons and their Related Parties

There are no other transactions between the Health Service and responsible persons and their related parties to be reported.

The Accountable Officer is remunerated by Castlemaine Health and details are reported in Note 8.7.

Note 8.5: Executive Officer Disclosures

Executive Officers' Remuneration

There are no executive officers whose total remuneration exceeds \$100,000.

Note 8.6. Related Parties

The hospital is a wholly owned and controlled entity of the State of Victoria. Related parties of the hospital include:

- all key management personnel and their close family members;
- all cabinet ministers and their close family members; and
- all hospitals and public sector entities that are controlled and consolidated into the whole of state consolidated financial statements.

Key management personnel (KMP) of the hospital include the Portfolio Minister and the Chief Executive Officer as determined by the hospital. The compensation detailed below excludes the salaries and benefits the Portfolio Ministers receive. The Minister's remuneration and allowances is set by the Parliamentary Salaries and Superannuation Act 1968, and is reported within the Department of Parliamentary Services' Financial Report.

During the year, Castlemaine Health, an Organisation of which Ian Fisher, Chief Executive Officer, is also the Chief Executive Officer, continued its extensive provision of contracted services. The contracted services involve the provision of extensive administration services such as Finance, IT, HR, and Food Services. The value of the contract during 2016-17 was \$222,323. Other non-contracted services occur as required. The value of net transactions for the 2016-17 financial year between Maldon Hospital and Castlemaine Health are \$664,690. All other transactions that have occurred with KMP and their related parties have been trivial or domestic in nature. In this context, transactions are only disclosed when they are considered of interest to users of the financial report in making and evaluation decisions about the allocation of scarce resources.

Maldon Hospital received funding from the Department of Health and Human Services of \$2,060,864 (2016: \$1,170,406)

Note 8.7: Payments to Other Personnel

Payments to other personnel (i.e. contractors with significant management responsibilities)

Expense Band	2017	2016
	No.	No.
\$150,000 plus	1	1
Total expenses (exclusive of GST)	\$159,183	\$155,300

In accordance with FRD 21C the following disclosures are made in relation to other personnel of Maldon Hospital i.e. Contractors charged with significant management responsibilities. Castlemaine Health are responsible for planning, directing or controlling, directly or indirectly, Maldon Hospital Activities.

Note 8.8. Remuneration of auditors

Victorian Auditor-General's Office	2017	2016
	\$	\$
Audit or review of financial statement	12,000	11,800
	12,000	11,800

Note 8.9. Events Occurring after the Balance Sheet Date

There have been no events subsequent to the reporting date which require further disclosure.

Note 8.10: AASBs issued that are not yet effective

Certain new Australian accounting standards have been published that are not mandatory for the 30 June 2017 reporting period. DTF assesses the impact of all these new standards and advises the Health Service of their applicability and early adoption where applicable.

As at 30 June 2017, the following standards and interpretations had been issued by the AASB but were not yet effective. They become effective for the first financial statements for reporting periods commencing after the stated operative dates as detailed in the table below. Maldon Hospital has not and does not intend to adopt these standards early.

Standard/Interpretation ¹	Summary	Applicable for annual reporting periods beginning on	Impact on public sector entity financial statements
AASB 9 Financial Instruments	The key changes include the simplified requirements for the classification and measurement of financial assets, a new hedging accounting model and a revised impairment loss model to recognise impairment losses earlier, as opposed to the current approach that recognises impairment only when incurred.	1 Jan 2018	The assessment has identified that the amendments are likely to result in earlier recognition of impairment losses and at more regular intervals. While there will be no significant impact arising from AASB 9, there will be a change to the way financial instruments are disclosed.
AASB 2010-7 Amendments to Australian Accounting Standards arising from AASB 9 (December 2010)	The requirements for classifying and measuring financial liabilities were added to AASB 9. The existing requirements for the classification of financial liabilities and the ability to use the fair value option have been retained. However, where the fair value option is used for financial liabilities the change in fair value is accounted for as follows: <ul style="list-style-type: none"> • The change in fair value attributable to changes in credit risk is presented in other comprehensive income (OCI); and • Other fair value changes are presented in profit and loss. If this approach creates or enlarges an accounting mismatch in the profit or loss, the effect of the changes in credit risk are also presented in profit or loss. 	1 Jan 2018	The assessment has identified that the financial impact of available for sale (AFS) assets will now be reported through other comprehensive income (OCI) and no longer recycled to the profit and loss. Changes in own credit risk in respect of liabilities designated at fair value through profit and loss will now be presented within other comprehensive income (OCI). Hedge accounting will be more closely aligned with common risk management practices making it easier to have an effective hedge. For entities with significant lending activities, an overhaul of related systems and processes may be needed.
AASB 2014-1 Amendments to Australian Accounting Standards [Part E Financial Instruments]	Amends various AASs to reflect the AASB's decision to defer the mandatory application date of AASB 9 to annual reporting periods beginning on or after 1 January 2018 as a consequence of Chapter 6 Hedge Accounting, and to amend reduced disclosure requirements.	1 Jan 2018	This amending standard will defer the application period of AASB 9 to the 2018-19 reporting period in accordance with the transition requirements.
AASB 2014-7 Amendments to Australian Accounting Standards arising from AASB 9	Amends various AASs to incorporate the consequential amendments arising from the issuance of AASB 9.	1 Jan 2018	The assessment has indicated that there will be no significant impact for the public sector.
AASB 15 Revenue from Contracts with Customers	The core principle of AASB 15 requires an entity to recognise revenue when the entity satisfies a performance obligation by transferring a promised good or service to a customer.	1 Jan 2018	The changes in revenue recognition requirements in AASB 15 may result in changes to the timing and amount of revenue recorded in the financial statements. The Standard will also require additional disclosures on service revenue and contract modifications.
AASB 2014-5 Amendments to Australian Accounting Standards arising from AASB 15	Amends the measurement of trade receivables and the recognition of dividends. Trade receivables, that do not have a significant financing component, are to be measured at their transaction price, at initial recognition. Dividends are recognised in the profit and loss only when: <ul style="list-style-type: none"> • the entity's right to receive payment of the dividend is established; • it is probable that the economic benefits associated with the dividend will flow to the entity; and • the amount can be measured reliably. 	1 Jan 2017, except amendments to AASB 9 (Dec 2009) and AASB 9 (Dec 2010) apply from 1 Jan 2018	The assessment has indicated that there will be no significant impact for the public sector.

Note 8.10: AASBs issued that are not yet effective (continued)

AASB 2015-8 Amendments to Australian Accounting Standards – Effective Date of AASB 15	This Standard defers the mandatory effective date of AASB 15 from 1 January 2017 to 1 January 2018.	1 Jan 2018	This amending standard will defer the application period of AASB 15 for for-profit entities to the 2018-19 reporting period in accordance with the transition requirements.
AASB 2016-3 Amendments to Australian Accounting Standards – Clarifications to AASB 15	This Standard amends AASB 15 to clarify the requirements on identifying performance obligations, principal versus agent considerations and the timing of recognising revenue from granting a licence. The amendments require: <ul style="list-style-type: none"> • A promise to transfer to a customer a good or service that is 'distinct' to be recognised as a separate performance obligation; • For items purchased online, the entity is a principal if it obtains control of the good or service prior to transferring to the customer; and • For licences identified as being distinct from other goods or services in a contract, entities need to determine whether the licence transfers to the customer over time (right to use) or at a point in time (right to access). 	1 Jan 2018	The assessment has indicated that there will be no significant impact for the public sector, other than the impact identified for AASB 15 above.
AASB 2016-7 Amendments to Australian Accounting Standards – Deferral of AASB 15 for Not-for-Profit Entities	This Standard defers the mandatory effective date of AASB 15 for not-for-profit entities from 1 January 2018 to 1 January 2019.	1-Jan-19	This amending standard will defer the application period of AASB 15 for not-for-profit entities to the 2019-20 reporting period.
AASB 2016-8 Amendments to Australian Accounting Standards – Australian Implementation Guidance for Not-for-Profit Entities	This Standard amends AASB 9 and AASB 15 to include requirements to assist not-for-profit entities in applying the respective standards to particular transactions and events. The amendments: <ul style="list-style-type: none"> • require non-contractual receivables arising from statutory requirements (i.e. taxes, rates and fines) to be initially measured and recognised in accordance with AASB 9 as if those receivables are financial instruments; and • clarifies circumstances when a contract with a customer is within the scope of AASB 15. 	1 Jan 2019	The assessment has indicated that there will be no significant impact for the public sector, other than the impacts identified for AASB 9 and AASB 15 above.
AASB 1058 Income of Not-for-Profit Entities	This standard replaces AASB 1004 Contributions and establishes revenue recognition principles for transactions where the consideration to acquire an asset is significantly less than fair value to enable to not-for-profit entity to further its objectives.	1 Jan 2019	The assessment has indicated that revenue from capital grants that are provided under an enforceable agreement that have sufficiently specific obligations, will now be deferred and recognised as performance obligations are satisfied. As a result, the timing recognition of revenue will change.

**Note 8.11: Alternative presentation of comprehensive operating statement
For the Year Ended 30 June 2017**

	Note	2017	2016
Grants			
Operating	2.1	3,535,275	3,244,968
